

At Massload, we know how inconvenient running wires from your scale to your scale house can be. This is why we developed a Wireless Loadcell Transmitter and Wireless Loadcell Receiver to enable you to work with any scale and any digital readout. To use the system you simply connect the WL8801 Wireless Loadcell Transmitter to your scale or load cell. Then all you need to do is connect the WL8802 Wireless Loadcell Receiver to any indicator and your system is now wireless!

When your indicator is turned on, the WL8801 transmitter transfers weight data to the WL8802 receiver which in turn shows the current weight on the digital indicator. It works just like a regular wire, but no wires are needed between the scale and indicator!

Wireless Specification:

- 900mhz radio link (US/Can ISM band)
- 868mhz radio link (European ISM Band)
- Range: 100 to 150 feet line of sight, depending on environment.
- Power: 4AA Batteries/Pad; replaceable.
- Life: 200+ hrs operating time.
- Sample Rate: 3 updates/second.
- Remotes hibernate when the base is turned off. No power buttons.
- Antennas are fully protected.
- Calibration is stored individually on each weighpad, pads can be swapped in and out of system.

Readout Options

Existing Digital Weight Readout

WL8802 receiver connects to any standard indicator

- The receiver connects to the back of your indicator and communicates by mV/V signal with the scale or loadcell
- The receiver is powered by the excitation voltage from the digital indicator.

Use the WL8801 transmitter in conjunction with a laptop or personal computer!

WL8700 Wireless PC Interface

Using Massload's specially designed hardware, you can receive up to 8 signals on your computer.

- Customizable database to fit your information needs.
- Requires 1 USB port, Win98, 2K, XP

Combine your wireless receiver and indicator into a single easy to use handheld system!

WL8600 Wireless LCD Readout

- Built in wireless Receiver
- Acts as an indicator
- Can receive up to 4 separate signals (scales)

WL 8900 Wireless PDA

- Built in Wireless Receiver!
- View up to 4 scales on the screen at the same time
- Save data and download it to your computer later

What can You Connect...Practically anything!
